Anvil Mining Reports Second Quarter 2009 Results

Montréal, Canada: Anvil Mining Limited (TSX, ASX: AVM), (“Anvil” or the “Company”), today announced a net loss for the second quarter ended June 30, 2009, of \$11.3 million (-\$0.13 per share), compared to net income of \$8.5 million (\$0.12 per share) for the second quarter of 2008. Net sales for the second quarter of 2009 totalled \$7.7 million, compared to \$59.8 million for the corresponding quarter in 2008. Negative cash flows from operating activities, before working capital movements, of \$6.4 million (-\$0.07 per share), compared to a positive cash flow of \$24.6 million (\$0.35 per share) in the second quarter of 2008. At June 30, 2009, the Company had a cash balance of \$48.7 million, available for sale investments of \$12.6 million, trade receivables of \$5.4 million and almost no debt. Copper production for the second quarter of 2009 totalled 5,372 tonnes.

The Company’s 2009 second quarter results were negatively affected by a number of factors including: significantly lower production and sales resulting mainly from the cessation of mining and processing operations at the Dikulushi and Mutoshi mines, lower realized copper prices and one-off charges of \$6.1 million.

Bill Turner, President and CEO of Anvil, commented, “While the strategy put in place during the fourth quarter of 2008 and implementation of a range of further initiatives have involved significant one-off impacts on the Company’s financial performance, we believe that the Company is now better positioned to move forward. The Kinsevere HMS plant which recommenced operations in late March 2009 is on target to produce 8,900 tonnes of copper through to the third quarter of 2009.”

Mr. Turner further commented, “We are especially pleased to have reached agreement with Trafigura for a combined debt and equity financing arrangement for an aggregate amount of \$200 million that represents a fully financed solution for the development of Kinsevere Stage II. With approximately 50% of the Stage II capital cost already incurred, this financing package will enable us to commence commissioning of Kinsevere Stage II in late 2010 and achieve commercial production in 2011. Annual production is expected to be 60,000 tonnes of Grade A copper cathode at an estimated “C1”¹ cash cost of \$0.89 per pound of copper. We believe that Trafigura, an internationally renowned, independent commodities trading company, represents an excellent long-term partner for Anvil and we look forward to working with them to successfully complete Kinsevere Stage II and further develop the Company’s interests in the DRC.”

¹ The C1 Cash cost is the mine gate cash cost that includes export duties and transportation and marketing charges but does not include royalties.

The complete second quarter 2009 unaudited financial statements together with the related Management’s Discussion and Analysis (MD&A) are available on Anvil’s website at www.anvilmining.com under the heading “Financial Reports” within the Investor Relations section.

Cash and Liquidity

As at August 12, 2009, Anvil had approximately \$40.0 million in cash, \$10.5 million in available-for-sale investments and \$5.2 million of receivables, the majority of which it expects to realize during the third quarter of 2009. During the next 12 months the Company’s commitments include \$12.2 million for *Pas de Porte* (entry premium) payments due to *La Générale des Carrières et des Mines* (“Gécamines”) with respect to the Kinsevere and Mutoshi amended agreements and \$19.5 million that relates to the Kinsevere Stage II development. In July 2009, the Company paid to Gécamines the first tranche of the *Pas de Porte* of \$10 million for Kinsevere, less an amount of \$2.2 million due to Anvil by Gécamines with respect to past purchases of copper concentrates by Gécamines.

Kinsevere HMS Production

The Kinsevere HMS plant was restarted on March 27, 2009, with feed to the plant sourced from the Run of Mine (“ROM”) stockpile and at June 30 has produced 21,655 tonnes of concentrate, grading 25.7% for 5,571 tonnes of copper. The HMS plant is expected to produce approximately 8,900 tonnes of copper contained in concentrates through to the end of the third quarter of 2009, at an operating cash cost at the mine gate of less than \$0.50/lb Cu (inclusive of sunk costs). Table 1 below sets out the details of the performance of the HMS plant for the second quarter and year to date.

In order to extend the operation of the HMS plant beyond the end of the third quarter 2009, during August, the Company plans to resume mining in the Stage I Central (Tshifufia) Pit where ore faces and broken stocks with an inventory of approximately 825,000 tonnes with a grade in excess of 5.0% copper are available.

Table 1. Performance of Kinsevere HMS Plant

	Second Quarter ended June 30, 2009	Year to date at June 30, 2009
Ore mined (tonnes)		
Ore processed ¹	83,084	85,780
HMS feed grade (%Cu)	7.9	8.0
Contained copper (tonnes)	6,566	6,837
HMS copper recovery (%)	70.9	70.9
Copper produced in concentrate	5,372	5,571
Copper sold ² (tonnes)	3,060	4,121
Operating cash cost (ex mine-gate) \$/tonne of concentrate	484	734

- Ore processed relates to ore processed through the HMS plant.
- At July 31, 2009, the Company held a stockpile of 5,295 tonnes of copper contained in concentrate.

Kinsevere Stage II

On August 10, 2009 the Company announced that it had reached agreement with Trafigura Beheer B.V. (“Trafigura”) for a combined debt and equity financing arrangement for an aggregate amount

of \$200 million that represents a fully financed solution for the development of Kinsevere Stage II. Under the terms of the equity financing, Trafigura will subscribe for Anvil equity units by way of private placement, which will result in proceeds to Anvil of \$100 million. Each Anvil equity unit will be issued at a price of C\$2.20 and consist of one common share of Anvil and 0.232 of one common share purchase warrant. The equity financing will be undertaken in two tranches, the first of which will bring Trafigura's aggregate equity interest in Anvil to 19.9% and the second of which, will increase Trafigura's shareholding to approximately 36% of the issued and outstanding common shares of Anvil, with an opportunity to increase its shareholding to approximately 39% on a fully-diluted basis should it exercise the common share purchase warrants.

Trafigura will also make available to the Company a loan facility with a total commitment of \$100 million. The term of the loan facility is five years from the first drawdown and all amounts outstanding under the loan facility will bear interest at a rate per annum equal to LIBOR plus 4%, plus the cost of political risk insurance.

The second tranche of the equity financing, the debt finance and the additional agreements described below are subject to normal regulatory approvals and shareholder approval.

In addition to the agreements reached in connection with the equity and debt financing, the Company has reached agreement with Trafigura on the principal terms of an offtake agreement, a technical services agreement and an ancillary rights agreement.

In July 2009, the Company re-engaged with Ausenco Limited ("Ausenco"), signing a contract for recommencement of work on engineering and design work relating mainly to electrical, piping and instrumentation, which was approximately 80% complete at the time the project was placed on hold in November 2008. The Company is also working to put in place a Lump Sum Turnkey contract for completion of the construction and fabrication works, the awarding of which is conditional upon receiving the normal regulatory approvals and shareholder approval of the funding package with Trafigura..

As at August 12, 2009 approximately \$199 million (\$179.5 million spent, \$19.5 million committed) of the budgeted cost of \$394 million had been invested. The increase in capital cost is a result of several factors including: redundancy payments to Kinsevere Stage II personnel; payment of demobilisation costs to contractors; charges associated with the cancellation of the engineering and design works; penalties in connection with the cancellation and suspension of orders; provision for reestablishment of contracts and remobilisation and some escalation primarily due to the contract being a LSTK contract rather than an engineering, procurement and construction management contract.

Conclusion of DRC Government Review of Anvil's Mining Agreements

During July 2009 the Company finalised an amendment agreement with Gécamines and the Government of the Democratic Republic of Congo ("DRC") on the revised terms of its Mutoshi Joint Venture ("JV") Agreement. As a result, the Company's interest in the Mutoshi JV has reduced from 80% to 70% and an additional *Pas de Porte* payment of \$14.4 million is payable to Gécamines in two tranches; \$7.2 million is to be paid within 6 months of the amended agreement and the balance (\$7.2 million) within 18 months. The finalisation of the Mutoshi JV negotiations, together with the amendment agreement reached on the Company's Kinsevere Lease Agreement and the Dikulushi Mining Convention, brings to an end the DRC Government's review of the Company's mining agreements.

Cancellation of Q2 Conference Call and Webcast

Please note that the second quarter 2009 conference call, previously scheduled to take place at 8:30 a.m. (Canada, Toronto time) today, Thursday August 13, 2009, has been cancelled due to the recent update provided at the conference call held on Monday August 10, 2009 on the agreement reached with Trafigura regarding a \$200 million funding package; the status of Kinsevere Stage II and the Company's cash position.

Anvil Mining Limited is a copper producer whose shares are listed for trading on the Toronto Stock Exchange (as common shares) and the Australian Securities Exchange (as CDIs) under the symbol AVM.

Caution Regarding Forward Looking Statements: *This news release contains "forward-looking statements" and "forward-looking information", based on assumptions and judgements of management regarding future events and results. Such "forward-looking statements" and "forward-looking information which may include, but is not limited to the operation of the Kinsevere HMS plant, the liquidation of the Company's available-for-sale investments and the Company's plans for expansions of the Kinsevere copper mine. Often, but not always, forward-looking information can be identified by the use of words such as "plans", "expects", "is expected", "is expecting", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "believes", or variations (including negative variations) of such words and phrases, or state that certain actions, events or results "may", "could", "would", "might", or "will" be taken, occur or be achieved. The purpose of forward-looking information is to provide the reader with information about management's expectations and plans for 2009. Readers are cautioned that forward-looking information involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Anvil and/or its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward-looking information. Such factors include, among others, the actual market prices of the available-for-sale investments, the actual market price of copper, changes in project parameters as plans continue to be evaluated, and the possibility of cost overruns, as well as those factors disclosed in the Company's filed documents. There can be no assurance that the Stage II expansion of the Kinsevere copper mine will proceed as planned or that the transactions proposed with Trafigura will be successfully completed within expected time limits and budgets or that, when completed, the expanded production facility will operate as anticipated.*
